

BCF Charge Report V4 - April 2024

The BOPC Order requires the BCT to publish BCF charges. This report published BCF Charge Quotes issued up to 17/04/2024. This report will be updated quarterly. Charges published in this report (Total Charge per Credit, Total Obligation) do not include the delivery fee and risk premium that are included in payments to the BCF. The BOPC Order includes a Transitional Cap for credits that were previously greater than \$5000. These are identified in the report. The cap expired on 16th October 2023. The BCF charge presented in the report does not necessarily reflect the actual cost to the proponent of acquitting their development offset obligation. The final column indicates that a payment has been made to the BCF for this credit type. The final number of credits paid for may differ from the number identified in the BCF Charge Quote. Market participants should consider other sources of market information and exercise judgment when using this information to estimate credit prices and consider obtaining expert advice.

BCF Quote Obligation No.	Quote Issued Date	Applicant Name	Applicant Type	Development Name	Development Type	Statutory Obligation Reference	Offset Statutory Obligation Type	Local Government Area	IBRA Subregion	Credit Type	OTG/Species	Hollow Bearing Tree Status	Number of Credits	Total Charge per Credit*	Capped Price	Total Obligation*	Paid Into BCF
